

SIMFLOFY MIGRATION

SIMFLOFY MIGRATION

Modern migration is very different to the rip and replace projects of old. Whether helping organizations to move away from expensive, difficult to maintain legacy systems or providing a simple mechanism to move on-premises solutions to the cloud, Simflofy Migration has the answer. Offering a robust and structured mechanism for organizations to migrate their information, Simflofy Migration simplifies and quite literally transforms the way corporate content and data assets are moved to a better place.

Information is now more valuable than both oil and gold - isn't it time you moved your information to a modern system to start making the most of it?

CONNECTED

Simflofy Migration allows organization to move content between 60+ of the worlds leading business and content applications, network and cloud storage systems, email archives and much more.

TRANSFORMATIVE

Migration is a perfect time to review, cleanse and enrich the information being moved between systems. Simflofy Migration has a wide range of functions including de-duplication, image conversion, and PII detection, meaning information is ready for use the second it hits its new home.

REDUCING RISK

By working in harmony with Simflofy Federation migration removes the need for big bang migrations. Content and data migration can be performed in the background, meaning less risk, less stress and a robust, controlled, and reversible process.
